Physical Examination Summary

Name: _____ Examination Date: _____

Applicant is fit for duty without restrictions for the anticipated job duties. If a significant change in job duties is contemplated, reassessment is advised.

Review of the history and examination findings has identified the following chronic/preexisting condition(s) that may impair the applicant's function and/or require accommodation.

Review of the history and examination findings has identified the following acute/subacute condition(s) that may temporarily impair the applicant's function and/or require accommodation. Further evaluation, treatment, and release from the patient's treating physician is recommended.

Caregivers

The above named individual has no signs or symptoms of communicable diseases.

TB test results not available. Employer should confirm negative results.

TB testing was negative.

Preliminary TB testing was positive but questionnaire and chest x-ray were negative. No evidence of active TB. Follow up with primary care physician or health department recommended.
